PROFILE

Senior Software Engineer with over 7 years of experience in .NET development and more than 10 years of overall experience in software and web development. Backend-first, with proven full-stack ownership and a specialization in integrating AI into production systems.

My core is the backend (C#, ASP.NET Core, EF Core, SQL), but I regularly own features end-to-end — including frontend work in Razor, TypeScript, Bootstrap and jQuery. Current focus: production integration of LLM-based solutions with OpenAI and Azure AI.

I enjoy working at the intersection of technology and business, grasp business processes quickly and communicate directly with product and stakeholders. As a Scrum Facilitator (PSM I), I actively help shape team processes. In the medium term, I am moving toward a Tech Lead / AI Engineering Lead role.

KEY ACHIEVEMENTS

Near 100% extraction accuracy

Built an AI-based pipeline for bank statements — measured on an internal benchmark of real documents

2 days → 5–7 minutes

Reduced a two-day manual document-processing task to a few minutes through AI integration

40% faster order processing

Centralized ERP processes in an enterprise environment at Stabovita

60% less manual logistics work

Integrated carrier APIs for fully automated shipping

EXPERIENCE

Senior Software Engineer (.NET) — 12/2024 - Present

Stern Ukraine — Client project: SOLU (UATECHCA) — Remote

AI-powered document analysis platform · SaaS · FinTech. Lead architect of the AI extraction pipeline for complex financial documents in mortgage underwriting.

- Architected and built an AI-based extraction and validation pipeline for bank statements with highly inconsistent formats — combining Azure AI, OpenAI GPT-5.4 and backend-side validation against business rules
- Developed a document authenticity-verification system to detect manipulated financial documents — verified by external banking-sector partners
- Developed complex income/expense calculations (monthly, annual, debt ratios) and rule-based transaction classification
- Prompt engineering and optimization of LLM workflows for accuracy, latency and cost
- Integrated billing and payments with Stripe (subscriptions, invoices, credit model)
- Acting Scrum Facilitator — internal AI enablement and onboarding of colleagues
- Close collaboration with product and stakeholders on business rules
- **Key Results: Near 100% accuracy on core financial data (internal benchmark); reduced a two-day manual process to 5–7 minutes**
- **Skills/Tech Stack:** ASP.NET Core, C#, OpenAI API, Azure AI / Document Intelligence, Entity Framework Core, PostgreSQL, Stripe API, Background Jobs

Volunteer Senior Software Engineer (.NET) — 09/2024 - Present

CharityLab Foundation — Remote

Microservices-based charity platform (non-profit). Volunteer work on a distributed platform for a non-profit organization.

- Designed and implemented a notification service
- Developed a customer/user portal within a microservice architecture
- Applied event-driven architecture with RabbitMQ for service communication
- End-to-end distributed logging with correlation IDs across HTTP and messaging
- Contributed to architecture decisions on service boundaries
- **Tech Stack:** ASP.NET Core, C#, RabbitMQ, Microservices, REST APIs, Distributed Logging

SKILLS

Core Backend

C# · .NET · ASP.NET Core · Web API · MVC · Razor Pages · Entity Framework Core · LINQ · T-SQL · REST APIs · Clean Architecture · SOLID

Frontend & Full-Stack

Razor Pages · TypeScript · JavaScript · Bootstrap · jQuery · HTML5 · CSS3

AI & Machine Learning

OpenAI API · Prompt Engineering · Azure AI · Document Intelligence · Azure OpenAI · Custom Fine-Tuned Models · LLM-Pipelines

Databases

MS SQL Server · PostgreSQL · MySQL · Query Optimization · Power BI

Cloud & DevOps

Microsoft Azure · App Services · Storage · Identity · Docker · Git · CI/CD · GitHub Actions · Azure DevOps · AWS

Architecture & Messaging

Clean Architecture · Domain-Driven Design · Microservices · Event-Driven Architecture · RabbitMQ · SignalR · Distributed Logging · Serilog

Other

WPF (MVVM) · WinForms · Atmel AVR · Windows Server · Scrum Facilitation

LANGUAGES

German — B1 (certified) / B2 (professional conversations) ●●●○○

English — C1 (passive) / B2 (active) ●●●●○

Ukrainian — Native ●●●●●

Russian — Native ●●●●●

EXPERIENCE

Software Engineer (.NET)
01/2024 - 11/2024

Stern Ukraine — Internal project
Remote

CRM & order-tracking portal. Built an internal customer portal for order tracking, order history and document access.

- Architected and implemented an ASP.NET Core MVC web application.
- Implemented order tracking, order history and document access.
- Integrated Microsoft Identity for authentication and RBAC.
- Responsive frontend development with Bootstrap and jQuery.
- **Key Results: Improved transparency for customers and internal teams; reduced status inquiries and internal communication overhead by ~35%.**
- **Tech Stack:** ASP.NET Core MVC, C#, Microsoft Identity, Entity Framework Core, MS SQL Server, Bootstrap, jQuery

Software Engineer (.NET)
04/2019 - 12/2023

Stern Ukraine — Client project: Stabovita
Kyiv, Ukraine

Enterprise ERP / WMS & logistics systems. 5+ years of long-term development of several tightly interlinked subsystems supporting sales, production and distribution.

- ERP/WMS core system: lot-based inventory management, pricing, contracts, invoices, foreign-currency payments, quality documents, Microsoft Identity RBAC with audit logging. Impact: ~40% faster order processing, ~20% fewer write-offs.
- Shipment automation platform: integrated carrier APIs for automated shipment creation, tracking and customer notifications. Impact: ~60% less manual logistics work, ~20% lower logistics costs.
- Financial module with FX revaluation: automated exchange-rate updates and revaluation of payments and contracts. Impact: fewer financial errors, ~50% faster reporting.
- AI-powered document processing (add-on): LLM-based extraction for invoices, delivery notes, quality and analysis certificates with multilingual localization. Impact: ~70% less manual data entry
- **Tech Stack:** .NET 6-8, C#, EF Core + SQL Server, WPF/MVVM, ASP.NET Core MVC, SignalR, EPPlus/OpenXML, OpenAI API, Docker, Power BI

System Administrator / IT Infrastructure Engineer
04/2012 - 03/2019

Stern Ukraine
Kyiv, Ukraine

7+ years responsible for the server, network and client infrastructure of an IT service provider. In parallel: a part-time second degree and further training in .NET development — a gradual transition to full-time software development from 2019.

- Administration of Windows Server and Linux systems
- Configuration and maintenance of network infrastructure (routers, switches, firewalls, VPN)
- Deployment, support and troubleshooting of client hardware
- Virtualization, backup concepts and disaster recovery
- Embedded projects: smaller control and monitoring solutions on Atmel AVR
- **Tech Stack: Windows Server, Linux, Cisco/MikroTik, VPN, virtualization, backup solutions, Atmel AVR**

EDUCATION

Bachelor Software Engineering
01/2017 - 01/2019

National Technical University of Ukraine “Igor Sikorsky Kyiv Polytechnic Institute”
Kyiv, Ukraine

- Officially recognized in Germany (ZAB) as equivalent to a German bachelor's degree.

Bachelor of Food Technology
2008 - 2012

National University of Food Technologies
Kyiv, Ukraine

CERTIFICATIONS

Professional Scrum Master I (PSM I)
Scrum.org · 2025

German B1
(100% in all exam sections) · 2025

Foundational C# Certification
Microsoft · 2023

.NET Core Developer Program
IT Education Academy (final grade: 100/100) · 2022

STRENGTHS

Backend Architecture
Clean Architecture, SOLID, DDD for maintainable systems

AI Integration
Production-ready LLM pipelines with OpenAI & Azure AI

Tech ↔ Business
Quickly understand business processes and implement them cleanly on the technical side

Scrum Facilitation
PSM I certified, actively shaping team processes

End-to-End Ownership
Deliver features end-to-end, from DB design to UI
